EXPERIENCE

Hepra Solutions Pvt. Ltd, Chennai – *Software Developer (full time):*
MERN | PWA. Sept 2025 – Present

- Implemented **Redis-based caching strategies** for a media management application, enhancing **performance** and **reducing load times** by **45%**.
- Led end-to-end development of a **production-grade media management application**, including backend services, APIs, and frontend integration.
- Deployed and maintained the application in a **live production environment**, currently serving **hundreds of active users** with high availability and reliability.
- Built a **WhatsApp-integrated CRM** using the **WhatsApp Business API**, implementing **webhooks** and event-driven workflows to enable automated client communication and reliable high-volume messaging

Hepra Solutions Pvt. Ltd, Chennai – *Software Development Intern (full time):* MERN | Figma | SQL. Mar 2025 – Sept 2025

- Built **SEO-optimized, performance-focused landing pages** for multiple company products using modern web standards, improving search visibility and page load performance.
- **Collaborated** with UI/UX designers using Figma to build **intuitive** and accessible user interfaces for **clients**.
- Automated **Excel-to-PDF** exports using Node.js and **BullMQ** message queues for handling CPU-intensive tasks, reducing manual workload by **80%**.

Aviotronic Tech LLP, Remote – *Frontend Development Intern:*
React.js | Tailwind CSS | Redux/RTK | PWA. Sept 2024 – Mar 2025

- Built an **Admin Panel** and **PWA-based E-commerce frontend** using React.js and Tailwind CSS.
- Optimized **caching strategies** for offline access and **installability**, scoring **92**% on **Lighthouse performance** and **100% in SEO** and Best Practices.

PROJECTS

Day-Track Pro *– Productivity & Life Tracking Application:*
Next.js| Node.js | Express.js | Mongo DB | Tailwind CSS| Redux

- Built a **cross-platform** app to help users **track emotions** and **habits** with daily logs.
- Visualized data using "**Year in Pixels**", enabling users to identify **patterns and track goals**.
- Improved **user habit retention** with custom reminders and **streak analytics**

Bliss-Wayfarer *– Collaborative Travel Planning App:*
React Native | Node.js | Express.js | Mongo DB | Expo | Tailwind CSS

- Built a travel platform for users to share **itineraries**, **blogs**, and **hidden destinations**.
- Implemented **collaborative trip editing** with **real-time** updates and custom visibility.
- Integrated **TF-IDF-based ranking** to **recommend** offbeat travel spots.
